EDUCATION

CUSAT School of Engineering

Kochi, Kerala, India | June 2028

B.Tech in Information Technology

Relevant Coursework: Data Structures, Object-Oriented Programming (C++), Computer Networks, Web Development

SKILLS

Languages: Python, C++, JavaScript

Web: HTML, CSS, React, Node.js, Express, MongoDB, MySQL

Tools: Git, VS Code, Linux, Kali Linux, Arduino IDE, WSL

Hardware & Security: Arduino, ESP32, Embedded Programming, Basic Penetration Testing, Network Fundamentals

EXPERIENCE

MathWorks (Virtual) | MATLAB & Simulink Intern

2024

- Completed training in computational thinking and AI/ML fundamentals using MATLAB and Simulink
- Built simulations for numerical computing and gained exposure to mathematical modeling and algorithm prototyping

PROJECTS

VR Video Call | HTML, CSS, JavaScript, WebXR/WebGL

Frontend / WebXR Project

- Built a browser-based VR video calling app with real-time communication in an immersive 3D environment
- Leveraged WebXR/WebGL APIs to render VR scenes directly in-browser without plugins; ensured cross-device compatibility for desktop and VR headsets

Smart Task Manager | Node.js, Express, MongoDB, React

Full-Stack Web App

- Built a productivity web app with user authentication, real-time task tracking, and RESTful backend APIs
- Implemented MongoDB for persistent data storage and created a responsive React frontend with full CRUD operations

Placement Tracker | Node.js, Express, MongoDB, React

Full-Stack Web App

- Built a web app to track job placement activities and application statuses with a responsive React frontend
- Designed RESTful backend with Node.js and Express; used MongoDB for data persistence and visualization

ESP32 IoT LED Control System | C++, Arduino IDE, ESP32

Embedded / Hardware Project

- Built an embedded system using ESP32 to wirelessly control LEDs, demonstrating hardware-software integration
- Applied IoT concepts including GPIO control and serial communication; programmed in C++ using Arduino IDE

ACHIEVEMENTS & ACTIVITIES

Full Stack Open | University of Helsinki (Online)

Ongoing

- Completing a comprehensive full-stack web development course covering React, Node.js, Express, MongoDB, GraphQL, and TypeScript
- Building multiple hands-on projects spanning REST APIs, single-page applications, and backend development best practices

Actively building skills across full-stack development, embedded hardware, and autonomous systems through personal and academic projects
